

NoiseBox®

Protect your meetings efficient from eavesdropping with the original NoiseBox®

Protect confidential conversations from spying

Smartphones and mobile devices are able to record conversations—often without users being aware of it. In meeting rooms where sensitive information is discussed, this creates a real risk of data leakage. NoiseBox® eliminates this risk. Simply place devices inside the NoiseBox® and close it. The built-in technology blocks microphones and cameras, making any recording impossible.

- Protects your meetings against eavesdropping and recording via mobile devices
- Eavesdropping often occurs through apps installed by users
- Validated by Swedish authorities
- Tested by RISE (Research Institutes of Sweden)
- Extremely complex, fully random noise generation
- Exclusive design
- FSC-certified wood
- Made in Sweden

Comes in different models and colors

Proven technology

NoiseBox® uses randomly generated noise that prevents speech from being recorded or understood. The technology was developed for law enforcement and defense and has been independently tested. This guarantees a very high level of protection against recordings.

(1) Bradley, J.S. and Gover, B.N. "A new system of speech privacy criteria in terms of Speech Privacy Class (SPC) values." Proceedings of 20th International Congress on Acoustics, ICA, 2010.
 (2) SNR calculated for relevant speech frequencies 160 – 5000 Hz, female and male voices of 85.5dB (human shouting).

Easy to use

- Place devices inside the NoiseBox®
- Activate the system
- Close the box
- Your meeting is protected
